S. Jeston Singh

+91-896-897-5668 | sjestonsingh@gmail.com | GitLab | GitHub | Mohali | Open to Relocation

Professional Summary

Backend Engineer with 2+ years shipping production features end-to-end. Distinguished GitLab open source contributor (top contributor 4 consecutive weeks, 15+ merged MRs). Expert in feature ownership from clarification through delivery and production follow-up. Proficient in Go, TypeScript, Node.js; designing maintainable, observable, secure APIs; database optimization; comprehensive testing; and async team collaboration. Experienced with AI coding tools for daily productivity.

Technical Skills

tabularx@l@ X@ **Languages** Go, TypeScript, Node.js, Python, Java, JavaScript, Bash, SQL
Frameworks Express.js, Spring Boot, Hono, FastAPI; Docker, Cloudflare Workers
API Design RESTful APIs, GraphQL, gRPC, OAuth 2.0, JWT, rate limiting, modular monoliths
Databases PostgreSQL (schema evolution, indexing, optimization), MongoDB, Redis caching
Testing Unit (Jest, JUnit), integration, end-to-end, contract testing, security testing
DevOps Docker, Kubernetes, Helm, AWS (EC2, S3, Lambda, RDS), GitHub Actions, GitLab CI
Observability Prometheus, Grafana, CloudWatch, structured logging, metrics, traces, MTTR
Practices Feature ownership, code review, async communication, AI tools (Copilot, Claude)

Professional Experience

Software Development Engineer March 2026 – Present
Updot Solutions Bangalore, India

- Owned backend features end-to-end: designed modular Go/Hono microservices on Cloudflare Workers achieving <50ms latency; wrote unit + integration tests (85%+ coverage) ensuring production reliability
- Built REST APIs handling 10K+ concurrent connections; optimized PostgreSQL through indexing eliminating N+1 queries (95% reduction); reduced MTTR by 60% via Prometheus + Grafana observability
- Collaborated asynchronously across product, frontend, and infrastructure teams; shipped 12+ features on schedule using clear design docs and deliberate code review culture

Full Stack Software Developer July 2025 – March 2026
WellVantage Gurugram, India

- Owned production Node.js microservices handling 15K+ req/min at 99.8% uptime; designed OpenAPI-documented APIs reducing integration friction by 50%; built JWT auth, migrations, and background job systems
- Implemented OAuth 2.0, rate limiting, OWASP best practices securing system (zero incidents); debugged distributed failures across DB/cache/queue layers; wrote runbooks preventing recurring issues
- Reviewed code for security, performance, and maintainability; mentored junior engineers on backend fundamentals, testing patterns, and production ownership mindset

GitLab Open Source Contributions

Portfolio: sjestonsingh.gitlab.io | **Handle:** @sjestonsingh | **Top Contributor (4 weeks)** | **50+ Merged MRs**

PostgreSQL Query Optimization for CI/CD Metrics Merged

- Optimized N+1 queries using window functions + composite indexes; improved execution from 2.8s → 380ms (86% improvement) benefiting 50K+ daily active users
- Added comprehensive test coverage validating edge cases; documented performance metrics in MR description

Modular API Gateway Service for Authentication Merged

- Designed isolated Go microservice handling OAuth 2.0 with bounded context isolation; reduced coupling across 8+ services by 60%; implemented circuit breaker achieving 99.95% uptime

Distributed Cache Layer for API Responses Merged

- Built Redis-backed caching using cache-aside pattern; reduced DB load by 70%, improved p99 latency from 850ms → 120ms; documented cache strategy enabling team extension

Education

Bachelor of Technology in Computer Science Expected: Sept 2026
Vellore Institute of Technology, AP

Achievements & AI Fluency

AI Tools: Daily use of GitHub Copilot + Claude for code generation, testing, documentation, debugging; skilled at validating output and correcting hallucinations. **Achievements:** Smart India Hackathon Winner | MSME National Ideathon | 50+ Open-Source Contributions | GitLab Top Contributor | Community Featured
